

Let Flagler Aircraft Service corrosion protect your aircraft today...

**CorrosionX Aviation** takes corrosion control to a new level. Featuring the latest advances in [Fluid Thin Film Coating](#) (FTFC) Technology, it is specially designed to displace moisture, stop corrosion instantly and provide long-lasting protection.

Made in the USA, CorrosionX Aviation is qualified under Mil-C-81309E, Type II for application to airframes and is used extensively by the military. All CorrosionX products and application equipment have been assigned National Stock Numbers by and are available through the General Services Agency (GSA).

Flagler Aircraft Service has trained mechanics and special equipment to reach all compartments and difficult-to-access areas of your aircraft. Upon completion of the treatment, a special sticker attesting to the treatment is placed in the logbook.

**Spring Special**

**\$295.00**
